

INCREASING THE FEVER

Once there was a doctor visiting a house to diagnose two patients, a rich housewife and her maidservant.

A rich housewife

her maidservant

Doctor examining both of them.

Doctor Said to maidservant

Oh! Your temperature is 105, so there is some anxiety...

So you should
take some
medicine .

Doctor to landlady...

Your temperature is only
99

So there is no anxiety for
you

**What! I have
only 99
and my
maidservant
has 105**

This doctor is useless. I am the landlady. Actually she should have 98 and I should have 110!

MORAL :

The modern civilization is inclined to increase the degree of it's fever up to 110. As in the human body there is death as soon as the temperature reaches 107, so by the nuclear weapons, modern civilization will come to the point of 107 and over. But devotees want to decrease the fever by living the highest, ideal life and decreasing the demands of the body.

- Srila Prabhupada .
