

THE THIRSTY CROW

*INSTRUCTIVE STORIES FROM
SRILA PRABHUPADA*

A thirsty crow looking for water

And saw a pitcher in the distance,
flew joyfully towards it

The pitcher certainly had water in it

it was so near the bottom

he strained and struggled but he could not reach it

Then he tried to overturn the pitcher so that he could at least have a little of the water when it will spilt on the ground

but he was not strong enough to do this.

Just then he saw some pebbles lying near

So he picked them up one at a time, and dropped them into the pitcher.

As the pebbles filled the pitcher, the water gradually rose until it was level with the top

the crow was able to drink

MORAL :

**A little intelligence can
save a lot of time.**
